

Quick Guide for Sprinter 2000

Nice to know

<p>When you are inside a shipment and you want to quickly change to another shipment: CTRL-S * <i>With this you can quickly type in another shipment number (or the last digits of the shipment number) and you will directly go to this shipment.</i></p>	<p>You quickly would like to know the phone number of one of your customers?: CTRL-B * <i>This opens the phonebook of Sprinter 2000</i></p>
<p>In the 'Search Shipment' screen you can move each column to your liking. You can also make the columns wider or smaller. If you would like to go back to the default setting, you can use the right mouse button and click in the 'Search Shipment' screen and then click 'reset columns'. The next time you open this screen the settings are default again.</p>	<p>At the bottom of the screen in a shipment (the grey part) you can click the customer, carrier or load/unload address to directly go to the customer settings in Sprinter 2000. This way you do not have to leave your shipment!</p>
<p>CTRL-N Opening a new shipment</p>	
<p>CTRL-O Changing a shipment</p>	<p>CTRL-P Opening the Planning screen</p>
